# Enjoy

You're probably familiar with the situation. The temperature outside is still enjoyable, but it starts to rain. Or, the sun is so bright that you just want to sit in the shade.

The LuxxOut® louvered patio roof is a product which allows you to change your environment at the touch of a button, when affected by undesired weather conditions. This is possible due to the ingenious louvers in the roof, which can be closed or opened

as much as you wish. Allowing you to control how much sunlight passes through. Or even to create a watertight roof.

Additionally, the innovative construction also provides a ventilating function during the summer months.

So there you go, now you can enjoy living outdoors even longer.

# Are you really getting...

*the most out of your garden?*

*Are you able to sit out in wind or rain?*

*It's time for a LuxxOut® louvered patio roof*

# Combine & customise

LuxxOut® patio screen

LuxxOut® louvered patio roof

LuxxOut® products can be combined and customised.

Virtually any colour, size and situation is possible. The benefits for you are the enormous freedom in opening and closing the sides and roof. Rain, wind or

simply sunlight can therefore be avoided from every side. And you even have the means to create privacy when you want!
